

# AMERICAN GEOGRAPHICAL SOCIETY

FOR IMMEDIATE RELEASE

## **The American Geographical Society Names Fr. Michael Rozier as EthicalGEO Fellow.**

*Description: The American Geographical Society (AGS) announces Michael Rozier, S.J., Ph.D. as a recipient of the 2019-2020 AGS EthicalGEO Fellowship.*

[New York City, NY] – [October 9, 2019] — The American Geographical Society (AGS) has awarded Michael Rozier, S.J., Ph.D. an EthicalGEO Fellowship as a result of the Society's recent EthicalGEO Challenge. The EthicalGEO Challenge, in its first year and underwritten by Omidyar Network, solicited videos from across North America and was open to anyone with an interest in exploring the ethical issues involved with the use of geospatial tools and technology. Applicants were instructed to submit a three-minute video explaining their "big idea" or project to address ethics and the use of geospatial tools and technology.

Fr. Rozier is an Assistant Professor in the Department of Health Management and Policy at Saint Louis University in St. Louis, Missouri.

Fr. Rozier says that geolocation data has great potential to improve our lives, but it can also contain sensitive personal health information. With this grant, Fr. Rozier will field a survey to gather public opinion on the use and misuse of geolocation data that reveals information about our health and health behaviors. He says that in an era of persistent data collection, we need a public conversation that is informed both by technology, asking what can be done, and by ethics, asking what should be done.

*"We are very pleased to have selected Fr. Rozier to join this first group of EthicalGEO Fellows. Ethical issues related to the use of geo technology have captured the interest of the media, geo practitioners and everyday citizens. All of us use this technology on a daily basis...be it to find a location using our phones, analyse data in our jobs, or better understand leading headlines in the media. Our use of this technology and data raises serious ethical questions...privacy, ownership of data, use of data...this list is long and growing. Fr. Rozier and the other Fellows will lead the way to help us make better decisions as we rely more and more on geospatial tools and data to live our lives."* said Dr. John Konarski, Chief Executive Officer of AGS.

Fr. Rozier will receive a \$7,500 award to carry out his project, participate in a number of special activities and events over the course of the next 9 months, and present the results of his work in a public forum in June of 2020. For more information about Fr. Rozier's project and the EthicalGEO Initiative in general, visit [www.ethicalgeo.org](http://www.ethicalgeo.org).

The American Geographical Society is a 21st-century learning society dedicated to the advancement of geographic thinking, knowledge, and understanding across business, government, academe, social sectors, and most importantly with teachers and students. Established in 1851, AGS is the oldest professional geographical organization in the United States. It is recognized worldwide as a pioneer in geographical research and education for over 168 years. The mission of AGS is to advance and promote geography in business, government, science, and education. Our goal is to enhance the nation's geographic literacy so as to engender sound public policy, national security, and human well-

being worldwide. AGS seeks to engage the American public, from its youngest to its oldest citizens, with new and amazing ways to understand and characterize our changing world. The Society maintains its headquarters in New York City.

*Fr. Michael Rozier*
